

## **Energy Conservation: All Staff**

Estimated time to complete: 20 min.

### **Course Description**

Energy is both limited and expensive. Campus energy conservation lowers the costs of unnecessary energy consumption and those dollars can be used instead for other budget needs. *SafeColleges' Energy Conservation: All Staff* course will familiarize all campus personnel, not just maintenance, with energy consumption and costs, along with ways to make their campus' energy use less expensive.

### **Common Themes**

- Differences between energy use in your home and at work.
- Understanding the basics of heating and cooling rooms on campuses.
- Smart energy-saving strategies for all staff.

### **Author**

Bryan Visscher is Director of Maintenance and Operations for the Wenatchee School District in central Washington. He is a recognized leader in the area of Energy Efficiency, winning the coveted national Energy Star designation for his district. Bryan is also a skilled writer, and is active in the Washington Association of School Business Officials (WASBO) and the Washington Association of Maintenance and Operations Administrators (WAMOA).

### **Training Environments**

*SafeColleges* is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeColleges* approach engages the learner in an e-learning environment while a Compliance Management System automatically tracks his/her progress through the courses. This assists the campus administrator or training coordinator in demonstrating compliance.
