

Fall Protection

Estimated time to complete: 25 min.

Course Description

Campus maintenance work is not without potential fall hazards. A basic foundation of fall protection is always required. *SafeColleges' Fall Protection* course is a comprehensive tutorial designed for all campus workers. The specific rules of the OSHA Fall Protection for Construction, which includes maintenance activities, comes in to play when either there is a fall hazard in excess of 6 feet above the surface below and/or a fall hazard exists over a dangerous situation such as machinery.

Common Themes

- Fall hazard statistics to help learners understand the importance of fall protection.
- A comprehensive Fall Protection program that includes engineering and administrative controls.
- Overview of standard measures of fall restraints including: warning line, guardrail, safety monitor and personal fall restraint lanyard.
- Addresses OSHA's federal guidelines for fall protection.

Author

Mr. Bryan Visscher is Director of Maintenance and Operations for the Wenatchee School District in central Washington. He is also a recognized leader in the area of Energy Efficiency for school districts, winning the coveted national Energy Star designation for his district. Bryan is also a skilled writer, and is also active in WASBO and WAMOA.

Training Environments

SafeColleges is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeColleges* approach engages the learner in an e-learning environment while a Compliance Management System automatically tracks his/her progress through the courses. This assists the campus administrator or training coordinator in demonstrating compliance.
