

Fire Extinguisher Safety

Estimated time to complete: 15 minutes

Course Description

Fire Extinguisher Safety gives an overview of the fundamentals of proper fire extinguisher use. The course illustrates the causes of campus fires, even showing some historical examples. The various classes of fires are also clearly presented so that learners are aware that the proper fire extinguisher must first be selected before attempting to extinguish a fire. Detailed illustration is also given on the proper technique of using a fire extinguisher.

Common Themes

- Reviews causes of campus fires and some coverage of history.
- Shares relevant statistics about campus fires.
- Uses the fire triangle to show the three elements that cause fires.
- Presents the five classes of fires as defined by the NFPA.
- Shows the various types of fire extinguishers.
- Detailed illustration of the "PASS" technique of fire extinguisher use.

Author/Reviewer

Mike Peterman is a Cincinnati Fire Department Official and a liaison to the Cincinnati Public Schools for development and Code consultation. He has served on teams including Hazmat Unit, Bomb Squad, Firefighter, and Emergency Medical Technician. Mike has also completed extensive coursework with the US EPA, the NFPA, the US DOJ, and the Ohio Dept. of Commerce.

Training Environments

SafeColleges is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeColleges* approach engages the learner in an e-learning environment while a Compliance Management System automatically tracks his/her progress through the courses. This assists the campus administrator or training coordinator in demonstrating compliance.
