

Health Emergencies: Hemophilia

Estimated time to complete: 8 minutes

Course Description

SafeColleges Health Emergencies: Hemophilia course is a concise tutorial designed for all school staff. Hemophilia is a rare disease characterized by the deficiency of clotting proteins found in blood plasma. All school employees must know the basics of hemophilia to be ready to respond to ensure the safety of students with hemophilia.

Common Themes

- Statistics on hemophilia
- Levels of severity of hemophilia
- Symptoms and complications of hemophilia
- Specific school and classroom suggestions to minimize injury

Authors

Suzan Tibbitts is a school nurse in Utah. She is directly responsible for the health care of over 9,000 students, and project manager of the Vaccine for Children program in the Granite School District. Suzan graduated from Westminster College with a Bachelors degree in Nursing and received her Masters of Nursing in Health Care Administration and Education from the University of Phoenix.

Janell Eastman is also a district nurse with responsibility for over 9,000 students in the Granite School District of Utah. Her past experience includes Surgical Nursing, Public Health Case Management and Occupational Health Administration. Janell graduated from Brigham Young University with a Bachelors degree in Consumer Economics and from Westminster College with a Bachelors degree in Nursing and received her Masters of Education from Cambridge College.

Training Environments

SafeColleges is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeColleges* approach engages the learner in an e-learning environment while a Compliance Management System automatically tracks his/her progress through the courses. This assists the district administrator or training coordinator in demonstrating compliance.
