

Health Emergencies: Life-Threatening Allergies

Estimated time to complete: 10 minutes

Course Description

SafeColleges Health Emergencies: Life-Threatening Allergies course is a concise tutorial designed for all school staff. Life-threatening allergies in the U.S. are steadily increasing, and all school employees must know the basics and be ready to respond to ensure the safety of students and staff.

Common Themes

- Examples of life-threatening allergies that are common among students
- Definition and explanation of anaphylaxis
- Symptoms of anaphylaxis and anaphylactic shock
- Overview of Epi-Pens and their proper use
- Important health care considerations in minimizing allergic reactions

Authors

Suzan Tibbitts is a school nurse in Utah. She is directly responsible for the health care of over 9,000 students, and project manager of the Vaccine for Children program in the Granite School District. Suzan graduated from Westminster College with a Bachelors degree in Nursing and received her Masters of Nursing in Health Care Administration and Education from the University of Phoenix.

Janell Eastman is also a district nurse with responsibility for over 9,000 students in the Granite School District of Utah. Her past experience includes Surgical Nursing, Public Health Case Management and Occupational Health Administration. Janell graduated from Brigham Young University with a Bachelors degree in Consumer Economics and from Westminster College with a Bachelors degree in Nursing and received her Masters of Education from Cambridge College.

Training Environments

SafeColleges is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeColleges* approach engages the learner in an e-learning environment while a Compliance Management System automatically tracks his/her progress through the courses. This assists the campus administrator or training coordinator in demonstrating compliance.
