

Lockout Tagout: Energy Release

Estimated Time to Complete: 45 minutes

Course Description

SafeColleges' *Lockout Tagout (LOTO)* course reviews procedures and work methodologies related to the identification and safe release of hazardous energy. The program demonstrates situations in which LOTO is required and encourages employee implementation of processes to protect themselves and others.

Common Themes

- Safe work practices to encourage proper LOTO procedures
- Examples of correct and incorrect LOTO processes
- Review of the OSHA CFR 1910.147 standard
- Defines differences between "authorized" and "affected" employees
- Identifies district responsibility for employees and contractors
- Provides information on an annual review of LOTO procedures

Authors

James Vaughan is president of Today's Resources, Inc. (TRI), a full-service safety and health-consulting firm. Jim has direct OSHA compliance and loss-control experience.

Karl Sommers III, a TRI associate, has experience as a safety director in a manufacturing environment and leadership duties within professional safety organizations.

Training Environments

SafeColleges is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeColleges* approach engages the learner in an e-learning environment while a Compliance Management System automatically tracks his/her progress through the courses. This assists the campus administrator or training coordinator in demonstrating compliance.
