

## Material Safety Data Sheets

Estimated time to complete: 15 minutes

### Course Description

SafeColleges' *Material Safety Data Sheets* course reviews procedures related to hazard chemical exposures for products that can be commonly found in schools. The course details the purposes and uses of material safety data sheets, and provides information on the OSHA CFR 1910.1200 standard. It also identifies where products with hazardous chemicals are commonly found in a school district environment (more places than you might think!).

### Common Themes

- Examples of correct and incorrect response of a chemical agent
- Review of the OSHA CFR 1910.1200 standard
- Provides a detailed study of Material Safety Data Sheets (MSDS) including critical information the various sections of an MSDS.
- Provides a detailed study of National Fire Protection Association (NFPA) guidelines

### Author

James Vaughan is president of Today's Resources, Inc. (TRI), a full-service safety and health-consulting firm. Jim has direct OSHA compliance and loss-control experience. Karl Sommers III, a TRI associate, has experience as a safety director in a manufacturing environment and a leader of professional safety organizations

### Training Environments

*SafeColleges* is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeColleges* approach engages the learner in an e-learning environment while a Compliance Management System automatically tracks his/her progress through the courses. This assists the campus administrator or training coordinator in demonstrating compliance.
